JOEL BALUMA

Software Engineer | React · Next.js · Laravel · WordPress

Tagbilaran City, Bohol, PH | +639358292737 | baluma.joel91@gmail.com | Github | LinkedIn | Portfolio

SUMMARY

Full-stack Software Engineer with 7+ years of experience building and maintaining production-grade web and SaaS applications. Strong full-stack background in React, Next.js, Laravel, and WordPress, with hands-on experience designing RESTful APIs, implementing secure authentication, and optimizing performance. Proven ability to deliver scalable systems, improve load times, and support real business operations in healthcare and enterprise environments. Open to long-term remote and contract opportunities.

EXPERIENCE

Software Engineer • Freelance July 2023 - Present

- Designed and optimized custom WordPress websites and solutions that improved conversion rates and aligned with client business workflows.
- Led development and maintenance of a Warehouse Management System (WMS), integrating external APIs to support payment processing, notifications, and cross-system data synchronization.
- Provided ongoing maintenance, feature development, and performance optimization for client web applications resulting in a 50% decrease in downtime.
- Spearheaded a mobile data collection app for a Government Rural Health Unit, digitizing demographic surveys and reducing manual processing errors.
- Engineered a web-based consultation management platform for clinics, supporting online appointments, patient record tracking, and streamlined provider patient coordination.

Software Engineer • Intetics Oct 2024 - Dec 2025

- Developed and maintained production WordPress websites using custom themes and plugins, including internal tools for managing and tracking form submissions.
- Improved website performance through caching strategies, SEO fixes, and asset optimization, resulting in ~60% faster load times.
- Customized and optimized Unbounce landing pages with JavaScript enhancements to improve UX and conversion performance.

Full-Stack Developer • CORH (Global OR Australia Pty Ltd) Jun 2018 - July 2023

- Delivered an enterprise hospital operating room management system used for real-time equipment tracking, surgical workflow coordination, and supply monitoring across clinical operations.
- Architected and implemented responsive frontend applications using React.js and Next.js, integrated with backend APIs.
- Built Laravel-based backend services supporting real-time clinical workflows and integrating external systems via secure API connections.
- Designed and developed RESTful APIs using Laravel (MVC), implementing JWT authentication, structured database schemas, and aligning integrations with healthcare interoperability standards to enable secure cross-system data exchange.
- Ensured system reliability and maintainability through structured Agile collaboration and iterative releases.

Full-Stack Developer • iSiteSolution Consultancy Mar 2017 - Jun 2018

- Hotel Reservation System: Built a real-time booking and room management platform with admin dashboards and reporting features.
- Real Estate Collection System: Developed a payment tracking system with automated balance computation, amortization logic, and financial reporting.
- Clinic Management System: Engineered a patient and appointment management platform with billing, records, and role-based access control.

Junior Front-end Developer • Hexiros Jul 2016 - Mar 2017

- Collaborated within a small Agile team to develop a School Management Information System (MIS) supporting accounting, enrollment, attendance, and student record management, with role-based access and reporting features to improve operational efficiency.

SKILLS

Core Technologies:
Laravel, PHP, React.js, Next.js, WordPress

APIs & Architecture:
RESTful API Development, JWT Authentication, MVC Architecture, Database Schema Design

Databases:
MySQL, PostgreSQL, MongoDB

Cloud & DevOps:
Docker, AWS, DigitalOcean, Laravel Forge, Vercel

Frontend & UI:
Tailwind CSS, Sass, Styled Components, Material UI, Bootstrap, Framer Motion

WordPress Ecosystem:
ACF, Custom Post Types, Taxonomies, Performance Optimization, Elementor, BricksBuilder

Tools & Engineering Practices:
Git, GitHub, Postman, Webpack, Sentry, Jira, Figma, API Integration, Scalable System Design

Additional Technologies:
React Native, Vue.js, Nuxt.js, Gatsby, Alpine.js, TailPress, Livewire

PROJECTS

MactanRock Warehouse Inventory System https://www.mactanrock-inventory.com/

- Developed and maintained a production-ready warehouse inventory management system supporting multi-location stock tracking, inbound and outbound processing, inventory adjustments, and real-time reporting.
- Built scalable Laravel REST APIs and dynamic React.js dashboards enabling high-volume inventory transactions, operational visibility, and accurate stock control across warehouse operations.

NEW YORK CITY ELECTRIC Inc. https://wirenyc.com/

- Developed a custom WordPress website using a fully tailored theme architecture optimized for performance, scalability, and brand consistency.
- Built custom WordPress plugins and backend functionality to extend core capabilities while implementing structured SEO, metadata optimization, and speed improvements to enhance search visibility.
- Implemented a structured Contact Us system with email automation, enabling inquiry handling, validation, and automated notification workflows to streamline customer communication and response management.

CORH Global OR https://corh.global-or.com/

- Enterprise-grade hospital operating room management platform designed to streamline equipment tracking, surgical supply monitoring, and operating room coordination.
- Enabled real-time visibility of operating room assets, supply usage, and workflow status to support clinical teams during pre-operation, intra-operation, and post-operation processes.
- Centralized operational data into a structured system that improved inventory accountability, reduced manual documentation, and strengthened coordination between surgical, administrative, and supply teams.

Budget Tracker https://budget-tracker.joelbaluma.com/

- Interactive budget management app designed for simple expense tracking and monthly financial planning.
- Includes categorized transaction logs, balance monitoring, and dashboard overviews that give users clear visibility into their financial activity and trends.

EDUCATION

Bachelor of Science in Information Technology (BSIT)

Holy Name University
